

Video Transcript: ACCESS-trained health care staff in the Eastern Region of Ghana

Augustina Galley

Senior Staff Midwife, Nkwateng village community clinic in the Birim North District

Because this facility is staffed by only one midwife, she is on call 24-hours/day and offers all types of services, including reproductive health services.

[Video of Augustina Galley, who is facing forward while speaking]

“I am Augustina Galley, a senior staff midwife of Nkwateng. I had an interesting case, which I deliver a baby. The baby was very asphyxiated but I drew the scale that I learned from ACCESS. I was able to resuscitate the baby and the baby is alive. Crying and kicking vigorously.”
